Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

LITTLE ITEMS OF LOCAL INTEREST

WANTED—Two good milk cows fresh preferred. Apply Walter Goudie.

Gordon Holmes of Boston, and Elmer Paulson of Calgary, were renewing acquaintances in Carbon on Saturday last.

Mrs. Gordon and son, Claire, left last Saturday for Wetaskiwin, where Mr. Gordon is employed.

Miss Vera Poxon has relinquished her position in the Farmers Exchange store and will leave shortly for Calgary where she will take up a business course.

Born to Mr. and Mrs. G. F. MacGregor on Monday, Oct. 1, a daughter.

Mr. King of the O. C. Arnott Co. of Calgary, was a Carbon visitor this week.

Dr. and Mrs. McFarlane returned last Thursday from Edmonton.

Miss Helen Smith has taken a position in the Farmers Exchange store. She commenced her new duties on Saturday.

Miss McClelland of Calgary, will be open for piano lessons at the Carbon Hotel every Monday and Tuesday.

A baboo or native clerk in India, who prided himself on the mastery of the English language and skill in its idioms, sent the following telegram in announcement of his mother's death: "Regret to announce that hand which rocked the cradle has kicked the bucket."

An enjoyable time was had at the Gamble School last Sunday when the Three Hills Orchestra played their annual visit to Gamble, this being the fifth year in succession that they have visited here. Rev. Mr. Shragg, minister of the United Church at Three Hills gave an interesting talk on Peace. Many others of the Three Hills congregation were present, among them being Mrs. Harvey Wright, who gave a wonderful reading entitled "The Christ of the Andes."

There was also a short programme rendered by the pupils and teacher of the Gamble school, the program consisting of songs and solos, which were greatly enjoyed by all. A beautiful solo was also rendered by Mrs. Wan, White, and accompanied by Miss F. Ferguson.

Last, but not least, was the lunch served by the Gamble ladies, and those who were absent do not know what an enjoyable time they missed. Rev. C. B. Oakley acted as chairman of the event.

Grocer: Here's your fly paper. Anything else?

Rastus: Yessah, ah want about six raisins.

Grocer: Do you mean six pounds?

Rastus: Naw, sah. 'Bout six raisins—jest enough for decoys.

Paul Hotson, Jeweler and Optometrist, Acme, has complete eye testing apparatus here every Thursday. Entrance through Regal Gas office. Mr. Hotson is an expert in his line.

It is estimated that about 75 per cent of the threshing has been completed in the Carbon district and so far this fall there has been no rain or damp weather to hinder the operations. There does not seem to be a congestion of grain in the Carbon elevators in spite of the swiftness in which the new crop is being moved this year. From four to five cars are available daily and if the railway can keep up this number Carbon will not rank among the number of towns where the elevators are overloaded.

—C. H. Bothamley, jeweler, will be at Peters Store every Thursday with an up-to-date stock of Diamonds, Watches, Jewelry, etc. First class repair work done while here. Leave repairs at Peters store.

CHESS CLUB ELECTS OFFICERS FOR COMING SEASON

At a general meeting of the Carbon Chess Club, which was held on Wednesday, September 26, the following officers were elected for the coming season:

Honorary President, P. Edwards
President, T. Laing
Vice-President, H. A. English
Sec.-Treas., W. A. Braisher
Executive Committee—T. Laing, H. A. English, W. A. Braisher, W. Dixon and C. McPherson.

SURF-BOARDING

Our palms are wet, our fingers clinging
Like sea-weed, I hear you singing.
As over waves, from crest to crest,
With fear a slide in our breast,
With a fear a whistling in our mouth,
We turn the surf-board southeast... South!
We shift our weight and slide and pass
Like shadows gliding over glass.
We stretch our bodies taut like sails,
Until our icy fingers
Press on our palms; and we are plunging
Into the surf and upward lunging.
Until our mouths gape open, wet,
And spray gleams on our lips like sweat,
And overhead a wave like thunder
Turns the board. And we go under.

NEW TELEPHONE DIRECTORY

This week a new and revised edition of the Carbon Telephone Directory has been issued from the Chronicle Office for S. E. Torrance, local agent for Fire, Life and accident insurance. The new directory is printed on a light green card and mentions the fact that two new telephones are being installed. The new Pioneer elevator's phone number will be 52, while the local agent of the Alberta Government, Telephones, Mrs. Moorhouse, is having a phone installed in her residence, the number being 40.

There are about two hundred and ten names on the new directory and many changes have been made since the last card was issued, so it will be well for everyone to make themselves acquainted with the new numbers. These cards may be had free of charge by applying to S. E. Torrance or to the local telephone office and everyone with a telephone should

(Continued on inside page)

SKELETONS BURIED FOR 3 MILLION YRS. IN BAD LANDS

That since exploration work commenced in the Bad Lands of Alberta in 1912, thirty-five different species of Dinosaur had been discovered along the banks of the Red Deer, was the striking statement made by Charles M. Stenberg of the Geological Survey in an illustrated lecture delivered in Drumheller last week.

Contrary to general opinion, Mr. Stenberg said, there were over three hundred different types of Dinosaur. The Bad Lands of Alberta provided an interesting hunting ground for the remains of these reptiles that lived over three million years ago and one of the finest specimens had been removed from the Moccie farm a few miles out of Drumheller.

The largest Dinosaur known to have existed was about one hundred feet in length but there were others that measured about two feet. In the course of his lecture, Professor Stenberg stated that paleontologists were now in a position to reconstruct the habits and life of these prehistoric reptiles with a certain amount of accuracy. The rocks had preserved impressions of the skin in many instances while footprints and other signs had also been traced. It was now generally accepted that the reptilian epoch had existed for nine million years and towards the close of that age the Bad Lands of this province were at about sea level and divided from Eastern Canada by a sea which extended from the Gulf of Mexico to the Arctic Circle.

During the month of August, 1928 a total of 3551 contracts were received in head office. This number of contracts involved a total of 473,704 acres of wheat or an average for 27 working days during this period of 143 contracts and 16,445 acres per day. Since the issuing of the second Series contract 10,934 new members have been added to the association.

Deliveries to Alberta Pool elevators reached a high water mark on September 24th when over one million bushels of grain were reported.

Leighton McCarty, K. C., a Toronto lawyer and financier, said in speech delivered in Calgary that the Wheat Pool was Canada's largest commercial undertaking, and remarked that Western farmers appear to be realizing the advantages of close organization.

By the end of the year the total number of Alberta Pool elevators will be 307, an addition of 147 houses during the year.

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexhausted, but that only a small fraction of them have been put to work. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Som years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potash industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potash industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fisheries, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

Shampoo Yourself With Cuticura Soap

Anoint the scalp, especially spots of dandruff and itching, if any, with Cuticura Ointment. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Sample Each Free by Mail. Address Canadian Depot: Richardson, Ltd., Montreal. Price Soap 25c. Ointment 25c and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Honor For Lost Fliers

Monument On French Coast Dedicated To Memory Of Nungesser and Coll

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coll has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription:

"To the First Who Dared."

At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two fliers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coll in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coll, May, 1927."

The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.S., says:—"With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefitted by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently.

Si Moulay Hemada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hopher, Powell, B.C.

Headache? Relieve with Minard's Liniment.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabastine.

SEND FOR FREE BOOK

Canada Gypsum and Alabastine Limited, Winnipeg, Canada

Please send handsome free booklet, "Walls that Reflect Good Judgment" which contains valuable information on Gyproc for farm use.

Name.....
Address.....

GYPROC Advantages for Farm Buildings

- Easy to use.
- Low cost.
- Workable as lumber.
- Cannot warp, bulge, crack, shrink or burn.
- Takes any decoration.
- Resists heat and cold.
- Vermin proof.
- Eliminates repairs.
- Protects your stock.
- Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings.
- Especially suitable for converting attics and basements into extra rooms.

"EMPIRE"
GYPROC
Fireproof Wallboard

74W

"I wonder if that old fat girl is trying to flirt with me?"
"I don't know, but I can easily find out by asking her—she's my wife."

Ballyplayer: "We gave the umpire fifty bucks to let us win the game."
Friend: "And still you lost?"
Player: "Yeah; the umpire was crooked."

FOR
COLDS

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin;
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

MOST OF BRITISH HARVESTERS ARE MAKING GOOD

Winnipeg.—"We are just finding out the slackers, that's all, and I am quite confident that the majority of the men are making good," declared Hon. Robert Forke, Minister of Immigration, following a conference regarding British harvesters, which he had with Thomas Geley.

About six hundred have been sent back to England, Mr. Forke continued, and possibly two hundred more will go back as having failed to make good; but that left something like eight thousand British harvesters in the western fields, who were not being heard from because they were too busy working.

He had talked with the physician who had examined 200 of the men sent on their way home and only one out of the lot had been really physically unfit, and he was subject to epileptic fits. The others could have worked had they not lacked the will.

"There is plenty of work," said Mr. Forke, mentioning that 1,500 men had been wanted at Regina this morning.

He had himself come back all the way from Ottawa to see that the five British harvesters on his own farm got a good start. He thought the farmers who cut the wages of British harvesters because of inexperience were a little shabby; at the same time he agreed that men new to the work were bound to be inferior to experienced hands.

The minister warmly praised the work of Mr. Geley in handling affairs at the immigration sheds under most trying circumstances. "No one could have done it better," he said.

All physically unfit British harvesters will be returned to the Old Country, Mr. Forke asserted, regardless of their desire about remaining here.

A non-political commission for the supervising of British immigration is not held to be a probability by the Minister of Immigration.

"I do not foresee any definite changes which would relegate the immigration question to a non-political field," he said. "It is likely that it will continue to be in the hands of whatever government happens to be in power."

Nova Scotia Nominations

Liberals Will Have Candidates To Contest Every Seat

Halifax, N.S.—With 24 candidates already selected, and 11 conventions on the book, the task of choosing representatives of both parties to contest in the provincial election is more than half completed.

Among the four Conservatives re-nominated was Col. Gordon Harrington, Cape Breton Centre, minister of mines, the fourth member of the Rhodes cabinet to re-offer. Six opposition candidates were chosen.

It was definitely stated by Liberal organizers that no seats will be conceded the government by acclamation.

Refuse Trade With Russia

Labor Congress Rejects Resolution To Resume Relations

Toronto, Ont.—Following a heated debate the Trades and Labor Congress of Canada rejected a resolution favoring the resumption of trade relations with Russia. Sponsors of the resolution contended that Russia was the only country in the world where the working classes were in control, and that there was a ready market in Russia for products of Canadian industry.

Must Carry Parachutes

Copenhagen.—Due to the frequency of accidents this year, all Danish military and naval aeroplanes will be equipped with Irving parachutes from Oct. 1. Military orders decree that no aviators should fly without a parachute attachment.

New British High Commissioner

London, Eng.—Sir William Clark, the new British high commissioner to Canada, accompanied by Lady Clark and their two daughters, are sailing for Canada on the Empress of Scotland.

Old Age Pensions Paid

Amount In B.C. Totalling \$441,222 Up To June Last

Ottawa, Ont.—Old age pensions totalling \$441,222 had been paid up to June last, to 3,150 persons in British Columbia who had taken advantage of the scheme, according to statistics just compiled by the department of labor. Of this amount the federal government paid one-half.

British Columbia's pensioners comprised 22 per cent. of the population of that province over 70 years of age. The average monthly pension was \$17.47, the pensioners being divided as 1,871 males and 1,279 females.

Property owned by these pensioners, is valued at \$1,520,782. Of the pensioners in British Columbia, 271 were previous residents of Ontario, 257 of Alberta, 179 of Manitoba, 175 of Saskatchewan, 75 of Nova Scotia, 37 of Quebec, 18 of the Yukon, and 10 of Prince Edward Island. When any of those provinces come into the scheme a proportion paid to the pensioners in British Columbia will be charged to the respective provinces. Saskatchewan has been paying pensions since June and expects to have 1,000 on its payrolls in September.

Manitoba and the Yukon will be paying pensions soon.

New Plane Tested

Demonstration At Los Angeles Proves Automatic Landing Feasible

Los Angeles.—A tiny plane constructed on a new vertical principle, made successful test flights here, demonstrating, observers said, that an aircraft can make an automatic landing.

Merle F. Kelley, who piloted the plane, was said to have taken the craft from the ground on 8½ seconds, soared sharply upward, cruised at 100 miles an hour and then landed with both hands aloft.

The new principle was described by A. A. Merrill, inventor, as tilting the wings, which are a single unit, in relation to the speed device in the cockpit.

The plane has a short fuselage and very little tail. In its construction the inventor was assisted by Dr. Clark Millikan, son of Dr. R. A. Millikan; Dr. Harry Bateman and Dr. A. L. Klein, all of the California Institute of Technology.

Submarine Rescue Device

U.S. Navy Tests New Apparatus For Saving Sub Crews

Aboard Submarine Salvage Falcon, Off Solomon Islands, M.D.—Successful deep sea tests with the "lung"—the navy's new breathing device, intended to enable men trapped in sunken submarines to reach the surface safely, have been made and if future tests prove as encouraging, all naval subs. will be equipped with them.

Three naval divers descended in a diving bell to a depth of 155 feet and arose slowly, breathing high atmospheric oxygen through a mouthpiece from a rubber bag resting against their chests. They reported no discomfort. It is said to be the most practical device ever invented for the purpose.

Will Publish Naval Accord

No Secret Clauses In Agreement Says Briand

Geneva.—The much-discussed Franco-British naval accord is to be made public by France through the League of Nations committee of disarmament.

Foreign Minister Briand of France, announced this decision after a speech before the League Assembly in defence of the agreements. He said the understanding would be introduced merely in passing, as an example of efforts being made to hasten disarmament.

In his speech he asserted that there were no secret clauses in the agreement.

Natives Should Avoid War

Geneva.—An earnest appeal that native races should forever be kept outside the range of modern warfare, was made by Hon. J. S. Smit, South Africa's high commissioner in London and representative of the League of Nations, in addressing the League assembly.

Mentioned For Important Post

G. W. Stephens, of Montreal, who has been mentioned as a possible selection for the post of Canadian minister to Tokio.

To Aid Non-Agrarians

Reduced Fares Arranged For Families Of Settlers Not Employed On Land

Ottawa.—Details of the extension of the assisted passage scheme to the wives and children of British settlers not employed on the land in Canada have been announced at the department of immigration. Assisted passages were formerly only given families of those who settled on the land.

A reduced steamship fare of \$18.25 has been arranged through the co-operation of the British and Canadian Governments for the wives and children of those who were satisfactorily settled in Canada on June 6, of this year. Children under 17 years of age will be free. The Canadian Colonist railway fare to the destination is the only added charge.

The arrangement has been made in order to implement a recommendation of the agriculturist and colonization committee made on June 5 last.

In order to avail himself of the reduced rates for his family the settler need only establish that he is successfully established in Canada and has a reasonable prospect of being able to support them.

To Reduce Traffic Accidents

Saskatchewan Government Would Encourage Garages To Use Headlight Testing Appliance

Regina.—Following up the recent conference called to consider ways and means of reducing traffic accidents, the Saskatchewan Government is now encouraging garages and filling stations to equip with a testing device for headlights, to allow a driver to quickly ascertain if his lights conform with provincial law.

The Saskatchewan law is that the beam must not be thrown higher than 42 inches at a distance of 75 feet. If the equipment installed by the service stations were found to come up to government standard, the government would then consider the plan of allowing the proprietors to issue certificates to drivers.

Entertained Prince George

Hollywood, Cal.—Prince George, who is a lieutenant of H.M.S. Durban now anchored at Santa Barbara, slipped into Hollywood by automobile and was the guest of Douglas Fairbanks and Mary Pickford.

Ex-Empress Dagmar Ill

Copenhagen, Denmark.—The ex-empress Dagmar, the 81-year-old widow of Alexander III, of Russia, and sister of Alexandra, the late Queen Mother of England, is seriously ill here.

Ramsay MacDonald Sails

Says He Is Sorry To Leave Canada, But Will Return

Quebec.—"I have left my heart behind me, and am sorry that I did not miss the ship, in order that I might see more of Canada," declared Right Hon. Ramsay MacDonald, former premier of Great Britain, as he mounted the gangway of the Empress of Australia en route for Southampton.

"I am going home full of most pleasant recollections of Canada. You have a wonderful country," he added, "and I hope to be back again next year. If it were left to me I would be back again next month."

"Just as soon as ever I get back to England, I will plunge right into the political fight. The annual meeting of the Labor Party at Birmingham takes place first, and then I shall go to the continent for two weeks, but after that I shall get right into the thick of it, and prepare for the general elections, which will take place next year. The results will be very good for us."

Fire Destroys Famous Hotel

Manoir Richelieu At Murray Bay Is Smouldering Ruins

Murray Bay, Que.—All that now remains of the Manoir Richelieu, famous Canadian summer hotel here, is a smouldering waste of crumbling stone, charred rafters and twisted steel girders. Fire of undetermined origin destroyed the famous hostel which for years has been a mecca for tourists from other parts of Canada and the U.S.

According to officials of the Canada Steamship Lines, in Montreal, the loss, estimated at \$500,000, is fully covered by insurance. Plans had recently been drawn up for the erection of a new building to be operated in conjunction with the manor but now it is stated these plans will be altered to include the construction of an entire new building, which will be erected probably on the site of the destroyed manor.

U.S. Building De Luxe Planes

Passengers Will Be Assured Of Every Convenience For Comfort

Los Angeles, Calif.—Four aeroplanes, capable of carrying 20 passengers, equipped with luxurious private apartments and sleeping berths, are being built by the Keystone Aircraft Corporation at Bristol, Penn., Edgar Scott, president of the firm has announced.

The new monoplanes, the largest ever built in America, are of all metal design and tri-motored. They can speed at 155 miles per hour. Provisions for hot and cold running water are made in the sleeping compartment and a radio will be installed.

Plot Nipped In Bud

Numerous Arrests Made In Spain Following Discovery Of Plot Against Government

New York.—Reports from the Franco-Spanish border say numerous arrests have been made in Spain after the discovery of a plot against the government of Primo De Rivera, who is about to celebrate his fifth anniversary as dictator of Spain.

A Hendays, France, despatch, says the arrests were reported to have been made in Madrid and other Spanish cities.

Infantile Paralysis In Montreal

Montreal.—Four cases of infantile paralysis were reported at the city hall in the past week and Dr. Boucher, medical officer, has issued a warning to take precautions against an epidemic.

NEW CABINET IN BRITISH COLUMBIA

Above are pictures of four members of the new cabinet in British Columbia. The year: 1, Premier S. F. Tolmie; 2, W. C. Shelly, minister of education; 3, Joshua Hinchcliffe, minister of education; 4, R. H. Pooley, attorney-general.

EVACUATION OF RHINELAND TO BE CONSIDERED

Geneva.—There are indications that Foreign Minister Briand of France, was ready for serious conversations on evacuation of the Rhineland.

In order to remain in Geneva for a second meeting of the powers of the question M. Briand cancelled a trip he had intended to make to Paris to attend a cabinet meeting.

At the first meeting on the subject, M. Briand, Chancellor Mueller of Germany, Under Secretary Von Schubert of the German foreign office, Lord Cushendun of Great Britain, V. Scialoja of Italy, M. Hymans of Belgium, and M. Lachi, of Japan, conferred.

Both M. Briand and Herr Mueller were smiling when they left the meeting. A communique issued later said:

"Conversations have commenced on the question of evacuation of the Rhineland, the discussion is still continuing and will be resumed on Thursday."

Opportunities In Peace River

Lord Lovat Finds That British Settlers Are Doing Well In North Country

Edmonton, Alta.—"There are wonderful opportunities for British settlers in the Peace River country," declared Lord Lovat, chairman of the British Overseas Settlement committee, on his return to Edmonton following a week's tour in Canada's far-west country.

"We met several of the British families who were settled at various points throughout the Peace district under the 3,000 family scheme, and without exception, all these people are doing well, and are more than satisfied with their venture."

"Many of these men were miners, and few of them had any previous farming experience, but they are making good, and their experience shows clearly that given the will to succeed, lack of experience is no bar to success."

Lord Lovat found that over 3,000 homesteaders and settlers have gone into the Peace district this year, and everywhere there prevails a spirit of optimism for the future.

Chamberlain Is Improving

Health Of British Minister Of Foreign Affairs Is Much Better

Hamilton, Bermuda.—Sir Austen Chamberlain, British minister of foreign affairs, walked unaided down the gangplank of the steamer Orcadia here in a drizzle of rain. He and Lady Chamberlain and their children embarked on the launch of Col. E. B. Leigh, acting governor of Bermuda, and went ashore for a few hours stay at Clifton, the Leigh home at Prospect.

This is the first port in Sir Austen's long voyage at which he had disembarked. Observers contrasted his unaided steps down the gangplank with the fact that he was carried aboard the ship at Liverpool. Members of the party said that he was showing steady improvement in health.

Gas Poisons German City

Sulphurous Fumes From Lignite Mines Create Panic In Halle

Halle, Germany. This city has had a taste of what it might expect in future wartime when aviators attack cities with gas.

A cloud of sulphurous gas was blown over the city from nearby lignite mines poisoning hundreds of residents, including many children. Many were made so ill they had to be treated by doctors.

The whole population was thrown into panic. It was necessary to close the schools.

France To Honor Tunney

Paris.—Convinced that Gene Tunney learned all about boxing in France, French sportsmen are affixing a plaque to a gymnasium at 26 rue de Pontonne where Tunney, as a Marine, in 1918, took some boxing lessons.

CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the East. In January the buds are bursting in Stanley Park. The balmy sea air, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white seagulls screamed and soared; squirrels retreated in chattering fright as he raced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"Op in," commanded Andy.

While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a pasty colour, as though his training had been done inside. His jaw was square and strong, his eyes

a mild blue, and his nose looked as though it had stopped many a solid punch. "Strong but slow," Donald decided.

When Andy introduced him Hagin merely grunted. To the fighter Donald was simply one more punching-bag.

Donald turned to Andy. "What do you want me to do?" he asked.

"Oh, knock the blighter out of the ring," rejoined Andy, with just a touch of sarcasm.

"Do you mean that?" queried Donald quickly.

Andy nodded.

Hagin came to the centre of the ring, assuming an awkward crouch, his arms wound about his face. Donald circled him warily. The big man feinted with his left. Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald sidestepped, jabbed his left twice to his opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over the big man's face. A murmur of applause came from the audience.

"Strike me pink! What a left 'and!" ejaculated Andy. Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald now took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drove his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be bested by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the flail-like swings, and shot a left upper-cut to Hagin's jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gesticulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner.

"Strike me lucky!" whispered Andy hoarsely. "You're punchin' me meal-ticket. You're makin' a blinkin' boob out of me 'eavyweight."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you were a blinkin' cyclone? Strike me blind, a left 'and like that I 'aven't seen since I dandled Young Griffo."

"What shall I do in the next round?"

"Tyke a punch and go down 'urt your 'and—anything to quit. But for 'eaven's sake don't mess up me 'eavyweight any more! If the public ever 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee, holding his hand and making a wry face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

As Donald stepped from the ring he was intercepted by a curly-haired youth whose brown eyes sparkled with enthusiasm. "By golly, I want to know you. My name's Douglas Rennie. My, but that was a wonderfully fast exhibition you gave us," he ejaculated, gazing at Donald with undisguised admiration.

Donald flushed. "I appeared fast," he explained modestly, "as I was against a very slow oppnoent. I know nothing of Garrieau, but he won't

have to be very clever to beat the Australian."

"Garrieau is fast and carries a knockout in either hand."

"I'm sorry for Andy's man if that is the case, as any kind of a left will beat Hagin. Come to the dressing-room," invited Donald.

A moment later Andy entered and sank dejectedly to a locker seat.

"You look rather blue, Andy," observed Donald.

"I am. All 'ell's a poppin'," admitted Andy.

"What's wrong?"

"I've lost me 'eavyweight. 'E's quit."

"Why?"

"Said I framed on 'im by sending you in this afternoon. Said I 'urt 'is pride."

"Pride!" echoed Douglas sarcastically. "You've been treating him too well. I never thought much of him as a fighter. You're too good a trainer to be wasting your time on third-raters."

"Maybe you are right," conceded Andy, "but look what a blinkin' mess I'm in now! 'Ere I am in the 'ole three hundred bones for training expenses, and I've put up a forfeit with the promoters for appearance. I'll lose the 'ole lot." He threw out his arms with an air of resignation and sank back in his seat.

Little Andy presented a pitiful figure as he sat hunched in the corner—his jaunty manner gone; his blond head, usually held at a saucy angle, sunk on his chest. Gloom, deep, impenetrable gloom, enveloped this bright spirit from the Antipodes.

Donald knew now that for all Andy's munificent manner of yesterday, the three dollars to "eat on" and the sorely needed dinner he had bought, had come from a generous heart, but a depleted purse. Here was his benefactor in trouble. How could he help him? He crossed the room, sat down beside Andy, and placed his hand on the little man's arm.

"Andy, take me on. I'll fight Garrieau for you."

Andy came to his feet with a jump and seized Donald by the shoulders. "If you'll do that, me lad, I'll be your pal for life. Strike me pink, did you 'ear that? I've got a real fighter at last! 'Ooray!" The little fellow was in ecstasies. "We'll clean Garrieau up," he went on excitedly, "and then I'll tyke you to the Stytes, and then to Austrylia, and..."

"Hold on," interrupted Donald laughingly, "looks like you intend making a professional pug out of me. I'm doing this to help you, Andy and," flushing in spite of himself, "I'm broke."

Andy glanced over Donald's tall figure with a professional eye. "You 'ave a week to get fit, and 'as you 'aven't 'ardly any weight to tyke off, you should be top 'ole in that time."

"RED ROSE TEA"

Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

**BACK To
GOD'S
Country**A STORY BY JAMES OLIVER
CURWOODA vivid human romance of the wild
waste lands with one frail woman
facing the thousand deaths of a
love-tortured soul.**DON'T MISS IT****OFFICE CAT**The melancholy days have come
The toughest of the batch.
The B. V. D's are mighty cold
The woollens make you scratch.A husband is a person who begins
to love clothes about the time his
wife tells him they are disreputable.

An I.O.U. is one kind of paper wait.

"So you have just got back from your
long week-end. Feel any change?"
"Not a penny."Johnson—So you have given up try-
ing to teach your wife how to drive
the car?William—Yes. When I told her to
release her clutch she let go of the
steering wheel.When Lindberg sends his shirts to
the laundry they send them for some-
one else. Of course we are not so pop-
ular. They only make part of ours.Never run after a street car or a
woman. There will be another along
in a minute. There are not so many
after mid night but they go faster.The University of British Colum-
bia at Vancouver has a new flag
pole second only in height to that
at Kew Gardens in London, Eng-
land. Each are one-piece poles of Douglas fir,
that at Kew being 214 feet high
and that at the University 204 feet
high. The Vancouver Court House
has one measuring 197 feet, while
the Province at Parliament Buildings
have one measuring 165 feet.The Australian Government has
just completed a deal for eighteen
foundation heifers and two bulls
from J. D. McGregor and Sons, the
widely known Aberdeen-Angus
breeders of Brandon. The animals
will be selected from Mr. McGre-
gor's Glencarnock herd by the head
herdmaster of the Australian Gov-
ernment and shipped by the Cana-
dian Pacific Railway by way of
Vancouver. This shipment apart
from some purebred dairy cattle to
the Orient from British Columbia,
is probably the first exportation of
purebred cattle from Canada over-
seas.**CHANGE OF TIME****CARBON-ACME-CALGARY

WANTS IN THE CHRONICLE****Noxious Weeds
Notice**Noxious weeds from mature plants are spread by the wind. Hand
pull and burn all such plants. Burn ripe blossoms of Sow
Thistle and Canada Thistle that you may find.Require all Threshing machines, combines, wagons and racks
used at the time of threshing, to be thoroughly cleaned be-
fore moving on to your farm or leaving it.Gather and burn all weed seeds left on the ground after the
threshing. See that your summerfallow goes into the winter
"black."Attend to this or much of the good work that has been
done in weed control and eradication will be undoneYour co-operation in the campaign for a 'weed free pro vince'
is solicitedRegister all threshing machines and combines with the Depart-
ment of Agriculture.W. J. STEPHEN
